the problematic calendar can be removed using MFCMAPI as per these steps:

1. open **MFCMAPI**

2. from **Tools>Options** make sure that "Use the **MDB_ONLINE** flag when calling **OpenMsgStore**" and "**Use the MAPI_NO_CACHE flag when calling OpenEntry**" options are checked

3. from **Session>Logon** select the Outlook profile for the affected mailbox and click **OK**

4. double click the affected mailbox to open it

5. expand the **root** container, then **right click** on "**Common Views**" and select "**Open associated contents table**"

6. in the new window that opens look at the **Subject** column and find an entry called "**affected user name here**"

7. **right click** on this entry, select "**Delete message**"
   and then "**Permanent delete passing DELETE_HARD_DELETE** (unrecoverable)
